TriGenius Studios

TriGenius

We are a passionate team of three designers and programmers with a strong focus on creativity. We combine skills from digital media, our diverse talents and skills combine to create innovative and elegant solutions. Triberius Studios is more than a team, we are a digital family working together with passion and dedication to bring your vision to life. Our design has mission is to bring your vision to life on screen and your success is our success.

Our values

Creativity
We encourage creativity in all aspects of our work, seeking innovative and original solutions.

Quality
We are committed to delivering high-quality work on every project, with no compromise on excellence.

Adaptability
We embrace change and are flexible in adapting to changing needs of our clients and the market.

Responsability
We take responsibility for our actions and commit to meeting deadlines and objectives.

Technological Innovation
We constantly seek to adopt new technological advancements to stay at the forefront of the industry.

Meet the team!

Jhohanson Jovel

I'm Jhohanson Jovel, I love video games, programming, design and animation. I'm a passionate creator who seeks to merge these disciplines to create immersive and innovative experiences. My goal is to bring to life worlds that exist only in my imagination and my hopes are to share my new insights with the world.

Through collaboration, innovation and dedication, we can continue to create more and better experiences that inspire and connect people with the world of art. I'm a fan of Lady Gaga, The Journey is just beginning, and I'm excited for all that is to come!

Karol Rosales

I'm a passionate web designer and developer, and Rosales was my greatest collaborator in creating captivating digital interfaces and experiences. My passion for design and programming has been cultivated in my sparring passion: mind-bending listening to music, and culinary exploration as ways to enrich my life and learn about new cultures. I'm excited to take my creativity to the next level and continue pushing the world of possibilities!

Alexander Rawda

You can call me Alex. I'm passionate about videogames, programming and design. I'm a videogame developer, and I'm currently working on a videogame called a technical course in "Multimedia Design and Integration". The experience I've gained from this course has been invaluable, and it has taught me a lot. I have been immersed in developing skills. I love to combine both skills to create interactive and visually appealing experiences.

I'm constantly looking for new ways to merge my love for videogames with my passion for design and programming. The opportunity to work on this project is a perfect fit for me. I look forward to sharing some of my creations with you!
